M & G Meeting August 27, 2019 New Facility Options/Wish List

- A turf field was agreed upon wide and long enough for football
- 2000 total seats with 1400 on the home side and 600 on the visitor side
- On the home side, the committee did decide to incorporate a roof style covering
- We also discussed a press box on the home side and a smaller press box on the visitors side
- Addition of approximately 50 folding style seats for fundraising purposes was discussed. The funds raised could be held to contribute to turf replacement.
- Our intent is to lay the structure for LED lighting for the stadium, but depending on the cost, we may have to choose to only put the bases in the ground and install the lights later depending upon cost
- Field goal posts, 35 second clocks and a new scoreboard will also be needed
- A 6 lane track was voted as a way to incorporate community use
- Underneath the home bleachers, access to store hurdles and other equipment would be useful
- Two water hookups in front of the 50 on the home and visitors side is also a good option (Also, power hookups near the 50 on either side would be useful.
- We would like to have one concession stand along with bathrooms and storage. Incorporating this to face the field would be nice so the concession stand workers could also watch the game.
- Another building with a wrestling practice facility large enough for one full circle. Also a new weight room included in this second building. Coaches offices, shower area and internal bathrooms could be included as well.
- One main entrance and a secondary entrance would be needed. The secondary entrance would be for EMS or emergency personal access as well as another point of exit. The main entrance would be for our main ticket gate.
